

Polychem Expands: Opens New Distribution Center

7214 Justin Way, Mentor, Ohio 44060

PLEASE NOTE:

**Polychem Corporation's Heisley Road Shipping and Receiving
Departments**

Located at 6277 Heisley Rd. Mentor OH 44060

will be CLOSED on FRIDAY MAY 10th.

Polychem will commence shipping from its new larger Distribution Center on May 13th,

2013. The location, 7214 Justin Way, Mentor, Ohio is over 100,000 square feet and just 3.6

miles west of the longstanding Polychem headquarters building at 6277 Heisley Road.

Polychem will retain its corporate headquarters, customer service and manufacturing site at the 6277 Heisley Road location while now enjoying additional space for an increase in manufacturing activity.

Polychem's strength in polyester and polypropylene plastic strapping sales has led to an expansion of several related product lines and services such as strapping equipment and systems, strapping tools, cord strapping, equipment parts and service, and various related accessories. Shipping from our new distribution center gives Polychem a logistical advantage in combining this wide array of products for better freight and handling costs.

In addition to these two locations, Polychem operates a state of the art PET bottle recycling and polyester strap manufacturing plant, Evergreen Plastics, in Clyde, Ohio. **West Coast customers are serviced from Polychem's Distribution Center located in the Los Angeles, California area.**

Polychem started manufacturing plastic strapping when the industry was in its infancy 35 years ago. Today plastic strapping is replacing steel strapping as a safer and less expensive alternative. The available building footprint of the Heisley Road location had been completely utilized with five major building additions over the past 30 years. Now by moving our finished goods inventory to the new distribution center, additional manufacturing space is freed up to continue with our expansion plans.

STAYED TUNED: POLYCHEM TO ANNOUNCE A MAJOR NEW PRODUCT LINE IN JULY!

Polychem has a consistent history of investing in plant, equipment and people to improve our service and value to our customers. The new distribution center is another example of

Polychem's commitment to the future growth of our business!

POLYCHEM MENTOR
