A PUBLIC SERVICE ANNOUNCEMENT FROM POLYCHEM®
REPEAL THE STEEL - Steel Strapping that is!

WHAT'S YOUR EXCUSE? QUIT TODAY!

With Summer just around the corner, did you know that one of the leading causes of summer accidents is employees and customers (especially when wearing short pants) cutting their legs on discarded or protruding steel strapping?

**Now More Than Ever, It's Time to Kick the Habit...
 The Steel Strapping Habit**

WARNING: Steel strapping can be hazardous to your bottom line, your employees, your customers, and your products. Quitting steel strapping greatly reduces your risk of accidents and saves you money.

Steel strapping also presents a safety hazard all throughout its' life cycle; from carrying and loading the 100 lb coils to applying the strapping, removing the strapping and finally the discarding of the strapping.

In addition to steel strapping being a safety hazard, the cost of steel is on the rise with the US levying new and larger tariffs on imported steel allowing for domestic manufacturers to raise steel strap pricing across the board.

NOW MORE THAN EVER, IT'S TIME TO KICK THE HABIT...
THE STEEL STRAPPING HABIT
