**Great for Lumber, Brick, Block, Pavers, Metals and other Industries that require heavy duty strapping**

## POLYCHEM POWER TOOL TESTIMONIAL

**Another "Automatic" Success Story! Try it you'll like it!**

A Midwestern Distributor that sells several competitor brands of tools asked Polychem for something new and better for steel to plastic strap conversions. Our regional sales manager demoed our new fully automatic battery tool on a joint customer call. His presentation featured the three modes of operation; manual, semi-auto and fully automatic. The results... an "automatic" success as the customer committed to two tools on the spot!

**In Summary the Customer Found that Polychem's B1200**

- Is Simple and Easy to Use
- Accommodates different strap thicknesses
- When operating in Automatic mode, the tool tensions uniformly across all loads
- A Strap Guide holds strap in place during Vertical applications
- Is Top Quality and an Outstanding Value
